Business Continuity Management & IT DR -2-day
workshop aligned to the Business Continuity Institute
Good Practice Guidelines - 2018

Develop your own organisational Pandemic Plan

A good pandemic plan must be 'fit-for purpose' and up to date. It must be practical and understood very clearly by all users.

A hands-on half-day workshop to learn the techniques.

Date: 2nd April (Thursday) from 9:00
am to 12:30 pm

At Waipuna Conference Centre,
Mount Wellington, Auckland.
Facilitated by ContinuityNZ

11:00 AM – Preparing the Plan

12:00 Noon – Plan Validation

12:25 PM – Summing-up

12:30 PM – End of Workshop, Lunch & Networking

Pandemic preparedness is a collective responsibility

As you are aware COVID-19 coronavirus outbreak is a concern for all of us. Since the confirmation of the single case of a positive case of the virus in New Zealand, there have been considerable amount of uncertainty and unnecessary panic.

People get panic when things happen unexpectedly, and you are not prepared.

Planning and preparedness will help everyone to take the right steps even in a worst-case scenario. If we don't plan and are unprepared, then it is a recipe for panic. At this stage, no one can predict what the future holds – whether the outbreak will be contained, or whether it will get worse. World Health Organisation (WHO) bears the same view.

As individuals and as organisations we feel we have social responsibility. We cannot take it casually. By taking the right approach to preparedness we could reinforce the efforts that the Ministry of Health and health professionals are taking to protect our society from this 'deadly' virus. Also, prevent the drastic impact on our economy.

Good practice dictates that every organisation should have a 'Pandemic Plan'. It must be practical, and all staff should know what has to be done if the plan is activated.

Pandemic Plan is a sub-set of the organisation Business Continuity Plan (if there is one!!). Otherwise, it can be a stand-alone plan, although, not ideal.

Why you should attend this workshop?

We bring to you years of experience and professional knowledge in development, implementation and audit of 'Pandemic Plans' using methodological approaches.

Some are of the view that a Pandemic Plan can be downloaded from the internet. This is the most impractical strategy and has no use. It is better to have a simple but effective plan in place that lets everyone in the organisation know exactly what must be done from the preventative point of view and the response, if a pandemic is declared.

This is a hands-on Workshop with the aim to provide the participants with a 'tool-kit' to immediately start working on the plan.
